INTRODUCTION

I am currently studying Marketing at Salt Lake Community College and plan to graduate from the University of Utah. With a passion for business and a goal to run my own robotics company in the future, I am actively seeking valuable experience to become a great marketer. I have a proven track record of reliable hard work and am eager to gain the skills and background necessary to excel in the marketing field, which will ultimately support my entrepreneurial ambitions.

WORK EXPERIENCE

ELECTRONICS TECH 2 - HILL AFB October 2023 - 2024

Working as an electronics tech 2 on base I work alongside others to rebuild and refurbish legacy avionics systems for the older aircraft in the United States Air Force. I am currently certified on 2 avionics assets. Additionally, I am certified for High Reliability Soldering.

ZIP STRING - INTERNSHIP Summer, 2022

Working as an Electrical Engineer at Zip String in Atlanta Georgia I assembled PCBs and soldered thousands of components and batteries. I excelled in micro soldering as I repaired miss-printed circuit boards and faulty surface mount components. Additionally, I helped improve processes and systems for a better workflow.

UNIVERSITY OF UTAH NEUROROBOTICS LAB 2022 - 2023

As a paid Research Assistant for the NeuroRobotics Lab, I used my skills and expertise to come up with innovative solutions to various issues regarding prosthetics and human interface devices for people with physical disabilities. One noteworthy project being my work to develop a low-cost EMG circuit board for future use in a wide array of applications.

AWARDS

TSA WEB DEVELOPMENT AWARD Jan, 2018
Technology Student Association (TSA)
